Part B for June 03

SUBJECT.

Birur water supply scheme

W D 88—GPB—50,000—24-7-16

Letter from the Chief
Engineer dated
8th July 1890 No. 2982.

—

The question raised
in the above letter has
to be decided by the
Dewan, as it ~~is not~~
to affects Provincial
Revenue.—

My own opinion
is that Health &
Sanitation of the Dist
people are more important—
than Revenue, the
Municipality must give the
required water for
drinking purposes,
& curtail cultivation
if necessary. The
Municipality can have
no right to dispute
the power of Govt

to use the waters of their Banks as they like, especially when the use is for the benefit of the inhabitants. — I would tell the Chief Engineer to examine the estimates & submit it. — When we know the actual amount required we can devise means for funding

C.C.P.
6/8/90

we can easily settle with the riparian owners their vested rights. The Corporation will be asked to examine the Estimates & let us know the actual amt req'd

Read ~~again~~ Government Proc

22nd November 1890 No $\frac{9610-11}{26626 1}$

Read letter from the Dy Comr. Kadur District dated

15 May 1891 No 84

Order thereon

In the Proceedings read above, the Government approved of the estimate of the water project for the town of Beevoor costing Rs 4,51,000 but before sanctioning the same, the Dy Comr was called upon to report the probable amount of revenue the Govt ~~might~~ would have to sacrifice by any diminution in the area cultivated under the tank in consequence of ~~the necessary~~ the decision of the ~~for retaining a covenant~~ water to ~~and sufficient supply of~~ ~~water for~~ the town, and also

The Dy C. has not done so. Please see Sewerage Proposals with about 2 lacs annual surplus. Draft & file prepared in accordance with this order

KR
8 6 91.

to state whether the Municipality is willing to pay 4 per cent interest on any loan, that might be granted by Government for the purpose of carrying out the Project. The Dy Com now explains that the Government revenue is not at all likely to be affected by carrying out the water Project and that the Municipal Board are willing to repay the loan of Rs 38.000 at Rs 1000 per annum, with an interest of 4 per cent per annum. Under these circumstances, the Government are pleased to sanction loan of Rs 38000 from Local Funds General at 4 per cent per annum - and to sanction the Chief Engineer

to carry out the Project 13

The question of imposing a water rate on the Towns people will bee considered after the completeon of the Project

(1)

1. I have no objection whatever to ~~such loan~~ grant the loan if he can repay it repayment within reasonable time. 38 years is too long a period — I don't see it clearly stated in the papers how the Municipality is to repay

2 The payments for the first year will be 1000
Interest on 38,000 15-20.
Total 25-20.
By paying this amount annually, the debt will be sooner repaid than in 38 years.

3 What can the municipality really pay? — that is to say what is their usual yearly balance and how much more can be reasonably raised by a Water tax? If in this way they can afford to pay say Rs. 3000 per annum we can easily determine how many such payments will discharge the debt & interest at 4%.

4 I find from the Municipal Reports that much saving from present Revenue can't be expected & Water rate has to be imposed to repaying ~~Stock~~ debt & interest
The population is said to be 4,000 and I fear that 12 annas per head for water will be too high an incidence. (What is the incidence in other places)

The Councillors have directed that this should not be issued

Another draft calling for additional information is to be issued

Prof. 27/6/91

Note

Send this for the approval of the Dewan

2. The Balance of the Local Funds General on 1st April 1891 is Rs 2,92,000

The estimated receipts for 1891-92 = 1,00,000

Total Rs 3,92,000

Of this, we have promised to lend Rs 40,000 to the Cheekmaglur Municipality and to give Rs 10,000 to each of the Districts for wells — So we have a net balance of Rs 2,72,000. We can therefore afford to advance As 38,000 to the Bowr municipality.

Member of Council

Bangalore
26th June 1891.

5- If we levy a ~~house~~ water Rate upon house Valuation, the income wd scarcely be a few hundreds If we levy it upon houses & Shops (on the basis of the Mohatarfa house & Shop taxes) even then the income wd be insignificant

6. In a small place like Barsi with say 40000 people and perhaps with 7 or 8000 taxable houses, it can't take a week & perhaps a Scheme for the proposed water rate, about which I confess I am rather sceptical, as House tax, Mohatarfa & Octroi are only 660, 660 & 820 in each year, & Conservancy lighting & Police alone come up to Rs 2000 per annum.

7. Under such circ[umstances] I think it desirable to have a Scheme for water tax Little abstract, before either Giving the loan or beginning this large work.

Yours sincerely

8/7/91

Memo

The Dy Comr Kadur in his Letter No 468 dated 9th December 1891 explains the sources from which the income of the Birur municipality may be augmented and recommends the grant of the loan required for carrying out the Water Supply project of to the town on certain conditions.

The annual receipts of the Birur Municipality amount to Rs 2595 or Rs 2600 in round numbers and the annual fixed charges of the municipality, allowing a sum of Rs 500 for Public works, to Rs 3360 or Rs 760 in excess of the ordinary income. To meet this deficit and to repay the loan promised by Government on account of the proposed water supply project for the town, the Board propose to augment its resources.

By levying Octroi duty on some articles other than those now subjected to duty, from which an additional income of Rs 725 is expected.

By the transfer of the Govt Share of Mohatarfa amounting to Rs 1326 to the municipality, and

By levying a water rate at 12 Annas in the Rupee of Mohatarfa including

House Tax, which is expected to yield Rs 1760.

The Government are not prepared to sanction any addition to the list of the articles now subjected to octroi duty. By conceding the Government share of octroi and by the introduction of the water rate, the municipal income will be bettered by Rs 3086. Setting off against this, the annual deficit, viz Rs 760 and the probable cost of the maintenance of water works, Rs 300, the sum available for the repayment of the loan, if sanctioned by Government, would be Rs 2026

The estimated cost of the water project is Rs 45000 in round numbers. Deducting these from the amount (Rs 5000) that the municipality is prepared to allot for the work out of its ordinary income and the contribution (Rs 2000) promised by the towns-people, the amount which the Govt have actually

to advance ~~as~~ Rs as loan is Rs 38,000, bearing an interest of 4 per cent per annum. If the Municipality be allowed to pay annually Rs 2026 in repayment of the loan with interest, the debt will be discharged in 36 years, as shewn in the accompanying statement.

Submitted for orders.

It would take a long time for the small Town of Ilpay the loan.

Bem is a town of growing importance and it seems to me that the whole cost of ~~that~~ project may be deposed of first. If this is considered objectionable I would propose that at least a moiety of the cost be contributed first and the other moiety advance

as a loan repayable
with interest at 4 p/c
Even then it would
be necessary to transfer
the Govt share of the
Industry. The Parliament
by every action an addl
authority seems systematic

The pte will be
land upon the Demesne
for admn ———

3 Sira
4 Kunigal
5 Chiknayakanhalli
6 Huliyar

President's letter no 732 dy 24th April 1903

Note.

All the plans are prepared on flimsy paper and some of them are torn already. There is not ~~the~~ ~~least~~ uniformity either in the size of the plans or in the method of preparation. In the Kunigal Petta and Fort plans, none of the main streets and roads have been named. As regards other plans, though main roads & streets have been named, minor streets have not been ~~mentioned~~ marked. The plan of the Pavagada Town is simply a copy of the Survey map of the place and serves no useful purpose as neither houses, nor public buildings nor streets are properly marked & named. None of the maps submitted.

Office Note

Letter no 808 dt 29-5-03 from the President of the Talks, Tumkur Dist. soliciting sanction to purchase tracing cloth required for the preparation of the maps of each Taluk, in the local market.

— " —

With reference to the Govt. order (X) that every Taluk should have three maps prepared, on which should be marked all the existing roads & lanes as well as all the proposed ones, the President states that he addressed the Superintendent of Stationery to supply the Talks of this district with tracing cloth necessary for the preparation of the maps; that the Superintendent pleads inability to comply with the requisition as no provision was made in the annual Stationery budget for supplying drawing materials to Talks; and requests

sanction to purchase trade cloth in the local market & meet the cost from the General Savings in the current years budgets of the Talukas concerned

In Govt Circ No 3610-C-D1 / 17210 77 16-9-96, it is laid down that no items of expenditure, for which provisions do not exist in the sanctioned Dist or D. F. budgets, shall in future be incurred or proposed to be incurred from General Savings, but that a re-appropriation ett or a Supplemental budget providing funds for such items be invariably submitted for the sanction of Government.

Submitted for orders, as to whether the President may be asked to sanction the probable cost of Rs 6/- the required for each municipality and to point out the particular Budget head under which savings are expected & from which the cost is proposed to be met in each town.

Dy 22/6/03

Bangalore

Sir

I have the honor with reference to the last para of your letter No 8126-7/323 dated 27th March 1884 pointing out that Municipal funds when they accumulate should be utilized in some important works in accordance with the late Chief Commissioners Proceedings No 3202-13/156 dated 25th September 1879, to state that I have just visited Birur one of the Municipalities referred to. It is a flourishing town of 4000 inhabitants

fact is very badly supplied with water.

2 There is a small tank above the town which could easily be in Mr. Inman, the Executive Engineer's opinion, who kindly visited the spot at my request, deepened and turned into a reservoir where the water could be filtered and from whence it could be without difficulty distributed through the town in pipes. The reservoir is fed from the channel of the Devankere tank which is fed from the large Madali tank and therefore the supply of water would be ample and continuous.

3. The inhabitants of the town are very anxious for the scheme

to be carried out and the Board has voted Rs 5000 of the balance of the Municipal funds and the members have subscribed Rs 2000 more towards it. I beg to forward the Proceedings of the Board with the Nadur Amildar's report No 23 dated 8th July 1889, and of the Govt approve of the same, request the favor of early sanction being accorded and of the D. P. W. being kindly instructed to prepare the necessary estimates and plans at once.

Rec'd 9-1888 Dec 4

No. 2752

MYSORE P. W. DEPARTMENT,
CENTRAL OFFICE,
Bangalore 8th July 1890.

From Lieut: Col C. Bowen R. E
The ~~Superintending~~ Chief Engineer of Mysore.

To The Chief Secretary to the Government of Mysore.

SIR,

With reference to your docket No: 3633/52 of 14th August last, I have the honor to forward herewith Plans and alternative Estimates (amounting to Rs. 12,280 and Rs. 13020 respectively) for the water supply of Berur, ~~proposed~~ prepared by the Executive Engineer, Kadur District. I cannot accept either of these estimates, for reasons which it is premature to enter into as yet, and I now address you mainly for the purpose of ascertaining whether the vested rights of the cultivators below the Berur Davenkere tank can in part be transferred to the Berur Municipality as without some such arrangement it seems to me useless to proceed with such a scheme as that proposed.

2. The source of supply proposed for the town of Berur, is the Berur Davankere tank. The present capacity of this tank is 120 units, its maximum depth 9 feet and mean depth 4½ feet. We are now raising the weir level

so as to increase maximum and mean depths to 42 feet and 7½ feet and capacity to 192 units. The tank is partially fed by a channel from the Madak Tank. –

3. The "Achkat" below the tank amounts to 899 acres, but the Executive Engineer reports that only 745 acres (307 garden and 438 wet) are under actual cultivation. The achkat" then requires the full amount of water that we can store in the tank, and the question is, can we reserve absolutely a certain portion (say half) of this water for the Berar Municipality? In other words can we prevent the ryots below the tank drawing off water when the level falls below a certain contour which we shall have to fix upon?

4. In his letter to you No: 179 of 17th July/89, the Dy. Commissioner states that the supply is "ample and continuous". Now this is distinctly negatived by the Executive Engineer who in para 8 of his Report states that the tank runs dry during the hot months, and this I believe to be the case, so that at the very time water would be most required in the town it would not be forthcoming. –

5. However, whether the tank will run dry or not, it is essential that, before we go on for a town water supply, the right of the town to a definite depth of the water in the tank should be secured, and this is a point which the Revenue authorities alone can determine. At any rate, until

until some definite understanding is come to regarding this, it is useless criticising the details of the scheme and without some assurance from the Revenue authorities that the difficulty can be got over. I cannot commit Government to the heavy outlay proposed, which will not be far short of ½ a lakh.

I have the honor to be
Sir,
Your most Obedient Servant
C. Lowe. Lieut Col R.E.
Chief Engineer of Mysore

Note by Colonel C. Norton C.E. Chief Engineer in connection to the Govt. of Ceylon & Public.

Berwa Water Supply

There are two alternative Projects. One provides for enlarging the Denethyaya Katte immediately above the town, and distributing water throughout the town by cast-iron pipes. The Katte to be filled from the Berwa Daweukere through an open Channel. —

The other is to supply the town direct from the Berwa-Daweukere by a cast-iron main. The water to be filtered before passing into the pipe. —

Both projects therefore depend on the supply in the Berwa-Daweukere. —

2. — As much as the supply to the Denethyaya Katte

katte would be through
an open channel, passing
through cultivated and
highly manured fields for
the whole of its length and
as the relative levels of the
land and the town would
render filtration of the water
difficult, I shall dismiss
the first alternative project
from consideration, unless
it is absolutely impossible to
find funds for the second,
the better one

3. — The first point to be
considered in connection
with this is the source of
supply. The Berner-Gamen-
-kare tank is being improved
so as to hold 192 units of
water (1 unit = 10,000 cyds),
and this quantity at least
it will certainly receive
every year, as, besides having
a good catchment basin
of its own, it is partly
fed from the Royal Basin
[illegible] Tank [illegible]

there will be water sufficient is indubitable. —

But the tank has a large area below it assessed as wet land and irrigated in part. It is alleged that the tank is already insufficient to afford full irrigation to the whole area, and as once the town supply is undertaken, the tank never be emptied, the area to be thrown out of cultivation has to be determined.

4. — Executive Engineers' Report, para 9, and his letter No. 118 of 24th Ultimo, in reply to my reference regarding the tank running dry in the hot months bear on this main factor the sufficiency of the tank, but unfortunately they are very indefinite and prove nothing. One thing is certain viz. to [illegible]

supply has been established the tank must not be drawn on for irrigation when its level has fallen to 3 ft. above the sill of sluice after the 1st December of any year. In other words once the monsoons are over the whole of the water between sluice level and the Contour 5 ft above must be reserved for the town.

This arbitrary arrangement will of course lead to conflicts, appeals, demands for compensation, remission, &c., but the Municipality with the aid of the Revenue authorities must be prepared to enforce it, if they commit themselves to the scheme.

5. — Supposing the above main point to be settled, I come to the other details which comprise a filter bed below the tank, service or distribution [illegible]

into which the filtered water is discharged, and a rising pipe to the town with branch pipes to the various streets. —

These are calculated for a daily supply of 20 gallons a head to 8000 people the population at present is 4,000, and it seems to me expedient to anticipate an increase of cent per cent even allowing for the effect of the adjoining railway. It is not likely that the number of inhabitants of so dirty and unhealthy a town will double for the next quarter of a century, and, apart from the population, I see no reason why a supply of 10 gallons per head, which I have recommended for Chichinzalan, should not prove ample. If this be received the dimensions

ed cost of works can be at
ree materially reduced.
.— Filter bed. The filter
ed is to have an area of
x 45' = 2250 sq ft. It is
supposed to filter water through
t a rate of 1/2 gallons per
superficial foot. Supposing
this, the filter bed
ould deliver the quantity
equired for 8,000 people
t 20 gallons a head. But
5 gallons would be the aver-
ge rate of filtration. Some-
imes it would doubtless
e much less; so that the
rea is insufficient. But
on the other hand if a popu-
lation of only 6,000 and a daily
supply of only 15 gallons be
adopted, as I recommend
the filter bed might be
much reduced in area
to but 1,000 sq ft would be
required, or the filter bed
might be say 35 ft x 35 ft.
Effect passing down through

the filtering materials, the water then is supposed to rise upwards into the service Cistern through the Syphon tubes shewn on plan. Question this arrangement, for although there is head to force the water into service cistern, it appears to me the rate of filtration through the layers of filtering materials must be materially affected. Can we count then on a rate of filtration of 60 gallons per square foot of filtering materials? I doubt it. —

I confess I am unable at present to pronounce definitely on this point, but as the arrangement has apparently been adopted to prevent loss of head and as the depth of water in cistern can easily be reduced from 10 ft to 6 ft. I would ca

there will be no difficulty in arranging for delivery from the filter bed at floor level, as is ordinarily done. The Service Cistern would have to be sunk a little lower, the main pipe laid for first half mile or so a little deeper. — A few remarks regarding inlets and out-lets for the water made in the Circulating filter beds apply to these filtered also. —

7. — Service Cistern — is designed to hold 2 days supply at the rate of supply above noted. Even to hold 1 days supply will be quite large enough more especially if the filter bed be divided into 2 Compartments by a central wall. And the contents may be based on any proposal for only 10 gallons a head for 6,000 people. Further, see

no necessity whatever for roofing in the Reservoir. It will be out in the open below the Earth Mound far from the town and there will be no liability to Contamination. On fact, to roof in in such a case, would be quite an unnecessary extravagance. The heating of the water need not be considered. There is no necessity for cross-walls; so by any modifications the cost of filter-bed and service Reservoir can probably be reduced from Rs. 30,740 as estimated to Rs. 15,000 only —

8. — Service Main.

A main pipe from the Service Reservoir to near the town is provided 1320 Ft. long, 5" diameter of $\frac{3}{8}$ thick. This will answer

of 10 gallons a head for 6000 people a pipe 4" diameter would suffice with the given head and a thickness not less than $\frac{3}{8}$ should be allowed and the reduction in diameter would at least a large saving, would in view of contingencies, allow the 5" diameter pipe to stand. Water main to be laid through or round the Amuthayana path, or how exactly to be laid not stated. —

4. — Protection. Branch pipes 6" diameter are allowed for distribution, which is sufficient. They to be limited to the 2 chief thoroughfares. For this diameter of pipe has been arrived at as current day pipe for the present current flow the pipe was stated 12. — Of having them the pipes to be fully

supply from the Berruvela-
=nkere to be settled, the
project for a supply of 10
gallons a head for 6,000
people would work out
as follows: —

Filtering bed & service Cistern —	Rs. 15,000
Main and branch pipes with fittings, fountains &c complete	" 29,060
	44,060

To this I would add, Rs. 500 for an independent sluice from the Vaveukere tank, with pipe and valve complete. I would not have the same sluice for town-supply and for irri-
=gation. —

Some compensation will be necessary, if only for the pipe track, site for filter-bed &c, say Rs. 500 and large compensation may be entailed for de-
=privation of the ryots right

to

to full irrigation for their assessed lands. —

11. — Should the above proposal be found quite beyond the means of the Municipality, then they must fall back on the cheaper but less unobjectionable scheme for filling the Dimuthayana Katte and delivering water therefrom direct to the town. In this case, I see no reason why the supply Channel should not be so protected by low bunds on both banks all along, as to prevent, or at all events materially diminish, the chance of its being fouled from the manured fields it traverses. And the "Katte" itself should be fenced off and access to it by the general public prohibited.

Accurate contours and sections should be taken to show exactly the work required,

required to make it hold a 20 days supply. This part of the project as it stands is inadequate and imperfect.—

Although there is very little head available it may be feasible to filter the water drawn off in some way. And as noted in para 10 above the dimensions of pipes to the town have to be further investigated and verified.

The cost of this scheme would, with the modifications & channel and tank & have noted above and with a filter bed, probably be c. Rs 15,000, supposing Executive Engineer's estimate and details of the pipes, fountains &c to be quite correct.—

12.— In conclusion I would draw the special attention of [illegible]

to the dreadful state of things in Berar described by Executive Engineer in para 21 of his Report - the Municipality are crying out for a pure water-supply yet they tolerate in their midst, without any attempt to remedy, what probably is more productive of disease than even the scanty and impure drinking water reservoirs they complain of. —

Burur Townspeoples
petition 25 Feb 91

1. We hear that an
cation will be sent up
for sanction for the
water supply of the
~~town~~ through pipes
from Devankere Tank
at a cost of Rs 45,000.
We think it impossible
get this heavy loan
from Govt. for this J
and to liquidate the
principle & interest
&c: &c we beg to state
as follows: ——
~~As verbally applied~~
We beg that water
maybe stored in the
Amroothianakatte
from Devankere
and supplied to the
town through pipes
at a cost of Rs 15,000
as verbally ordered
that water be stored
the Amroothian

the wells in the Town will invariably be benefitted by water. This process can be completed at a small cost.

4. We hear that you were of opinion that water at the Lal Katte will be defiled which we state, may be prevented by keeping guards at it.

Under these circumstances we beg that pipes may be placed from the Amroothiana Katte itself.

Respectfully submitted.

About 100 people have signed the above petition.

Govt. Pro: No. 9610. 11

of 22nd Nov. 1890 are put up for reference

D.I. Feb 91

3/91

I do not know how far the present petitioners represent the inhabitants of Bandra but Mr. Brown who has visited the spot believes that Rs 15000 -

Mr Rustomjee does not live in Bandra but in Mr. Brown's Estate. Can we omit Civil Hospital information & opinion.

2 March 91 -

Respectfully submitted to the Vice President.

2 March 91

I think the first scheme is worst but before deciding I would send them to the Civil Surgeon of Bandra for his opinion & report.

4/3

Mr. Brown's letter 1/3/91.

Rec'd 19th

Above 3 Respectfully submitted.

I have taken a statement from the influential men who signatures are appended to the petitions, and this explains under what circumstances the petitions emanated. It is clear from the admissions contained in the statement, that the petitioners bestowed no sufficient consideration on the relative advantages & merits of the two schemes reported upon by the P. U. D.; that the petitioners, in expressing their preference for the Annexation Matlé scheme have been influenced solely by considerations of cost; that some persons have signed the petitions because others had done so; and that the petitions have been the work of interested men who feared without sufficient reason that water supply meant a heavy load of taxation. I

have explained to these people
the advantages accruing from
the more complete scheme now
and they have now transferred
their support to this from the
other scheme. They have also under-
-taken to explain to the people
the superiority of the ~~central~~ scottish
of the two projects over the other,
and to silence objections, where
such may exist.

Among the signatories
of the petitions, the influential
persons number not more than 10,
and with the exception of one or two
of these, all the others have received
my personal explanations on the
subject & subscribed to the
statement now taken.

I remain and
Madam
Your obedient
servant
5th March 1849.

Govt order no 9610-11-266 d
6/d 22nd novembe 1890, regd th
the water-supply project of Burm
was placed for consideration by
the Muni Board at a meeting
held on the 26th januar 1891.
the proceedings of the Board sub
-mitted to the President, were
returned with certain remarks
The said proceedings have been
now separately re-submitted (co
of the Board's Resolution regd the
the water-supply project is here
attached - The Board in their
Resolution, accept with thanks the
-ness the offer of government to
a sum of Rs 38000 for the
of carrying out the scheme of wa
supply, on the conditions as to repay
as specified - They think it is ma
not be possible to make the ar

payment to Government for the existing resources of the Municipality as to Revenue, and that probably they will have to add to those resources by levying a water-tax: the question, it seems to me, may be reserved for future consideration —

Since the Board expressed their views on the subject, some petitions were received by the Dy: Commissioner, purporting to be from the inhabitants of Birur, and those petitions ~~the~~ shewed that the people were disposed to favor the scheme of taking water into the town from Kurtianakatte, on the ground of its being less costly — I have since met some of the petitioners & discussed the matter with them — I have convinced them of the utter inadequacy of the less costly project for the purpose of securing a water supply such as Birur is in need of and they have

Omitted to me that it was their ignorance of the disadvantages of the measure that led them to pronounce themselves in favor of it, and that their opinion had been influenced exclusively by a consideration of cost. I have reported detailedly on the subject separately.

The filthy condition of Brisbane is due chiefly to the drains not being as it did be. The drains are in most places that fail wh prevents water from stagnating. It is proposed to set them in order with due regard to levels, and it is hoped that when this work is completed will be very much better

I beg that early steps may be taken to obtain the sanction of Govt. to the Water-

so that the work ma

be sent in hand without loss of time

Respectfully Submitted.

The Revenue accounts show that the area irrigated by the Davankire Tank is as follows:—

Under cultivation							
Wet		apresent	garden	apresent	Waste		
509·21	acres	1599-4-a	358-3	3479-8	acres	apresent	
					92·28	327-4	
				Total -	960·12	Rs 540	

The tank is fed by a channel from the Nuddy tank, the channel having also a considerable extent of direct cultivation under it, as follows

Under cultivation						
Wet	apresent	garden	apresent	Waste		
51	2119-8	121·30	44-12-a	acres	apresent	

3 No portion of this extent of land dependent upon the tanks for irrigation The 960 acres are all that the tanks has to supply water to

4 All this extent of land has for a long series of years been supplied with water by the Iravankere tank which until the period of the inauguration of its repairs two years back, was, I understand, calculated to hold only 129 units.

5. How a tank, calculated to hold 129 units has been able to meet the requirements of 960 acres, is to be accounted for by the following considerations:—

1st That the tank, besides having a sufficiency of its own catchment area, which is 14 square miles is fed by a channel from Madagiri tank, which is a great resource as the store in the Iravankere tank exhausted, it can be replenished an extent sufficient to answer requirements.

2nd. That the irrigated area reduced to nearly half the extent garden land, which does

constant irrigation and that once a week watering in hot season and at longer intervals at other times is ample for such lands -

3rd - That in wet lands, one crop only is usually raised, that paddy cultivation here is not carried on in the style practised in Mysore + other places that it does not require constant irrigation, that watering once in 20 days is sufficient - + that the crop is cut generally by the end of December -

6. What is the state of things now?

1. The waste-weir of the Davankere tank had no water-tight wall in front, which led to about one ft. of water at the top level, i.e. about 25 units wasting itself away by percolation - This is now remedied by building a masonry wall in front -

2. The Kodi is now raised by 3 ft. so as to admit of the tank holding 223 units, and will eventually be raised one foot higher still -

3. The waste-weir of the Madag tank, which is the feeder, is purposed to be raised, when the tank will hold more water, greatly to the advantage of the interests

lies upon Davankere tank -

4. The Madag tank is the resource, at present, of not only the lands dependent on its channel as well as Davanhéi tank, but also of a large extent of land in Chikkingala & Kadiri, to which latter place it supp drinking water also. There is a proje before the D. P. W. to restore a tank called Hallé Madag which I learn has so far advanced as to be ready for the work being put in hand at once. This work when completed, will relieve the Madag tank from a consi-derable portion of the demand whi at present exists against it & be all the storage of the Madag will available for use in connection wit the interests depending on its own channel & Davanhéi tank.

It can be, therefore, confidentl hoped; I think, that the combined effect of these measures will be, to allow of an adequate supply being kept IV. constantly in the Davanhéi tank for all necessary purposes.

the tank must not be drawn on
for irrigation when its level has fallen
to 3 ft. above the sill of sluice
the 1st December of any year". I have
consulted some of the intelligent men
of the ryot class in this matter, and
find that the arrangement proposed
commends itself to them - They believe
that a constant retention of water
in the tank helps to keep a permanent
moisture in the gardens below it,
wh benefits them considerably; & that,
in consequence, the absorption of water
by the gardens during irrigation is
less than it otherwise would be, thus
reducing the consumption of water.
With regard to wet lands, they state
that the arrangement does not injuriously
affect them, as paddy is generally cut
before the end of December -

9. Under the above circumstances,
my humble opinion is that the
establishment of the proposed water-cess
will not lead to any loss of the
existing revenue by curtailment of the
irrigated area though it may affect
in some measure the extension
of area; that the loss, if loss

of the extent of prospective increase
of wet cultivated area by conversion
of dry-land into wet; and that sec
ond is no more than what is repre-
sented by the wet assessment of land
that can be irrigated by the quantity
of water that the water-supply proj
will consume —

10. The question which I have
attempted to answer is in some
degree of a speculative nature, and
it is accordingly in a spirit of some
diffidence that I have ventured to
make the foregoing observations

I have the honour to be
Sir
Your most obedient
humble servant
Kadir

READ :—

Note by Colonel C. Bowen, R. E., Chief Engineer and Secretary to the Government of Mysore, Public Works Department.

BIRUR WATER SUPPLY.

There are two alternative projects. One provides for enlarging the Amrathayanakatte immediately above the town, and distributing water throughout the town by cast-iron pipes. The katte to be filled from the Birur-Davankere through an open channel.

The other is to supply the town direct from the Birur-Davankere by a cast-iron main. The water to be filtered before passing into the pipe.

Both projects therefore depend on the supply in the Birur-Davankere.

2. Inasmuch as the supply to the Amrathayanakatte would be through an open channel, passing through cultivated and highly manured fields for the whole of its length, and as the relative levels of the tank and the town would render filtration of the water difficult, I shall dismiss the first alternative project from consideration, unless it is absolutely, impossible to find funds for the second, the better one.

3. The first point to be considered in connection with this is the source of supply. The Birur-Davankere tank is being improved so as to hold 192 units of water (1 unit=10,000 c. yds), and this quantity at least it will certainly receive every year, as, besides having a good catchment basin of its own, it is partially fed from the Raya Kalve of the Madak Tank. That there will be water sufficient is indubitable.

But the tank has a large area below it assessed as wet land and irrigated in part. It is alleged that the tank is already insufficient to afford full irrigation to the whole area, and as once the town supply is undertaken, the tank must never be emptied, the area to be thrown out of cultivation has to be determined.

4. Executive Engineer's Report, para 9, and his letter No. 118 of 24 ultimo, in reply to my reference regarding the tank running dry in the hot months, bear on this main factor, the sufficiency of the tank, but unfortunately they are very indefinite and prove nothing. One thing is certain; when the town supply has been established, the tank must not be drawn on for irrigation when its level has fallen to 3 feet above the cill of sluice after the 1st December of any year. In other words, once the monsoons are over, the whole of the water between sluice level and the contour 3 feet above must be reserved for the town.

This arbitrary arrangement will of course lead to conflicts, appeals, demands for compensation, remission, &c., but the Municipality, with the aid of the Revenue authorities, must be prepared to enforce it, if they commit themselves to the scheme.

5. Supposing the above main point to be settled, I come to the other details, which comprise a filter bed below the tank, a service or distribution cistern into which the filtered water is discharged, and a main pipe to the town with branch pipes to the various streets.

These are calculated for a daily supply of 20 gallons a head to 8,000 people. The population at present is 4,000, and it seems to me extravagant to anticipate an increase of cent per cent, even allowing for the effect of the adjoining railway. It is not likely that the number of inhabitants of so dirty and unhealthy a town will double for the next quarter of a century, and, apart from the population, I see no reason why a supply of 10 gallons per head, which I have recommended for Chikmagalur, should not prove ample. If this be accepted, the dimensions and cost of works can be at once materially reduced.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 22nd November 1890.

6. *Filter Bed*—The filter bed is to have an area of 50 × 45 = 2,250 sq feet It is supposed to filter water through at a rate of 72 gallons per superficial foot Supposing it does this, the filter bed would deliver the quantity required for 8,000 people at 20 gallons a head But 60 gallons would be the average rate of filtration. Sometimes it would doubtless be much less, so that the area is insufficient But on the other hand, if a population of only 6,000 and a daily supply of only 10 gallons be adopted, as I recommend, the filter bed might be much reduced. An area of but 1,000 sq. feet would be required, or the filter bed might be say 35 feet × 35 feet.

After passing down through the filtering materials, the water then is supposed to rise *upwards* into the service cistern through the syphon tubes shown on plan I question this arrangement, for although there is head to force the water into service cistern, it appears to me the *rate of filtration* through the layers of filtering materials must be materially affected Can we count then on a rate of filtration of 60 gallons per square foot of filtering materials? I doubt it

I confess I am unable at present to pronounce definitely on this point but as the arrangement has apparently been adopted to prevent loss of head, and as the depth of water in cistern can easily be reduced from 10 feet to 6 feet, I should say there will be no difficulty in arranging for delivery from the filter bed at floor level, as is ordinarily done The service cistern would have to be sunk a little lower, the main pipe laid for first half mile or so a little deeper. My remarks regarding in-lets and out-lets for the water made on the Chikmagalur filter beds apply to this filter bed.

7 *Service Cistern*—is designed to hold 3 days' supply at the rate of supply above noted Now to hold 2 days' supply will be quite enough, more especially if the filter bed be divided into 2 compartments by a central wall And the contents may be based on my proposal for only 10 gallons a head for 6,000 people. Further I see no necessity whatever for roofing in the reservoir It will be out in the open, below the tank bund far from the town, and there will be no liability to pollution. In fact, to roof in in such a case, would be quite an unnecessary extravagance The heating of the water need not be considered. There is no necessity for cross-walls, so by my modifications the cost of filter bed and service cistern can probably be reduced from Rs 30,740 as estimated to Rs 15,000 only.

8. *Service Main*—A main pipe from the service reservoir to near the town is provided, 13,200 feet long, 5 diameter and $\frac{3}{8}$ thick. This will answer. For the modified supply of 10 gallons a head for 6,000 people, a pipe 4" diameter would suffice with the given head, but as thickness not less than $\frac{3}{8}$' should be allowed and the reduction in diameter would not effect a large saving, I would, in view of contingencies, allow the 5' diameter pipe to stand. Whether this main is to be led through or round the Amrathayanakatte, or how exactly to the bifurcation of branch pipes is not stated

9. *Distribution*—Branch pipes 6" diameter are allowed for distribution which is apparently to be limited to the 3 chief thoroughfares How this diameter of pipe has been arrived at I cannot say, so for the present I must pass the item unnoticed

10. Supposing then the right to supply from the Birur-Davankere to be settled, the project for a supply of 10 gallons a head for 6,000 people would work out as follows

Filtering bed and service cistern	Rs	15,000
Main and branch pipes with fittings, fountains, &c, complete	„	29,060
		44,060

To this I would add Rs 500 for an independent sluice from the Davankere tank, with pipe and valve complete. I would not have the same sluice for town-supply and for irrigation

Some compensation will be necessary, if only for the pipe track, site for filter-bed, &c., say Rs. 500 and *large* compensation may be entailed for deprivation of the raiyats' right to full irrigation for their assessed lands.

11. Should the above proposal be found quite beyond the means of the Municipality, then they must fall back on the cheaper but less unobjectionable scheme for filling the Amrathayanakatte and delivering water therefrom direct to the town. In this case, I see no reason why the supply channel should not be so protected by low bunds on both banks all along, as to prevent, or at all events materially diminish, the chance of its being fouled from the manured fields it traverses. And the "katte" itself should be fenced off and access to it by the general public prohibited.

Accurate contours and sections should be taken to show exactly the work required to make it hold a 20 days' supply. This part of the project as it stands is indefinite and imperfect.

Although there is very little head available, it may be feasible to filter the water drawn off in some way, and as noted in para 10 above, the dimensions of pipes to the town have to be further investigated and verified.

The cost of this scheme would, with the modifications to channel and tank I have noted above, and with a filter bed, probably be Rs. 15,000, supposing Executive Engineer's estimate and details for the pipes, fountains, &c., to be quite correct.

12. In conclusion, I would draw the special attention of Government to the dreadful state of things in Birur described by Executive Engineer in para 21 of his Report. The Municipality are crying out for a pure water-supply, yet they tolerate in their midst, without any attempt to remedy, what probably is more productive of disease than even the scanty and impure drinking water reservoirs they complain of.

No. 9610-11—266-L. 61, DATED 22ND NOVEMBER 1890.

ORDER THEREON.—Forwarded to the Deputy Commissioner and President of the Municipality for his remarks.

2. The Government consider that, under the circumstances stated, the first alternative project is the one that should be carried out. A provision of 10 gallons a head is ample, and the cost of the estimate may be taken at Rs. 45,000, in round numbers.

3. The raiyats are not entitled to any compensation for deprivation of water to their assessed lands, but before sanctioning the estimate, the Government wish to know the probable amount of revenue the Government will lose by the curtailment of the irrigated area.

4. The Deputy Commissioner states that Rs. 5,000 can be spared from the Municipal Funds, and Rs. 2,000 have been subscribed by the people towards the cost of the work. He is requested to report whether, in the event of the Government granting a loan of Rs. 38,000, the Municipality is willing to undertake its repayment by annual instalments of Rs. 1,000 with interest at 4 per cent per annum.

5. The attention of the Deputy Commissioner is drawn to the last para of the Note read above.

Under-Secretary.

To—The Deputy Commissioner, Kadur District.
The Chief Engineer.

Passing orders on the proposed wate supply project for the town of Birur.

Mysore Govt. Central Press, Bangalore.—2-12-90.—120.

Read:-

Letter from the Dy Com
Kadiri District dated 15th May
1891 #1084, explaining how
the Government will not lose
any appreciable amount of
revenue by the enclachment of
the irrigated area in connection
with the water supply project
for the town of Beevor

No 9 C 1328

Order thereon

No. 4328
L 289.

Dated: 13th July 1891.

Under the circumstances
stated the Government are
willing to advance the loan
requested and to sanction the
execution of the work, if the
Municipality can satisfy them
that it would be able to
discharge the debt at Rs 1000
a year plus the interest on
the loan at 4 per cent per
annum. The Dy Com is
therefore requested to explain
fully from what sources the
municipality expects to discharge
the debt pay the interest
The Govern to observe that
the

Receipts		Expenditure	
I Octroi	721	II Head office	841
II Octroi on houses	670	III Collection	101
VII Ecclesiastical	656	IV Conservancy	1093
X Miscellaneous	619	V Police	843
		VII Lighting	609
Total	2695	VIII Pounds	0
Excess of expenditure over receipts	214	X Education	369
		XI Miscellaneous	90
		Total	2859

the ordinary charges of the Municipality, exclusive of all provision for Public works exceed the ordinary receipts by Rs 214, as detailed in the margin. This being so, it is not clear how the Municipality will be able to pay annually 1000 Rs towards the principal besides interest, which would, for the first 13 years be more than Rs 1000 as shown in the margin. If the debt is to be discharged from a greater base, the Govt is requested to state the principle upon which he proposes to make the charge, and the probable amount he expects annually and the sum that could be ~~devoted~~ available for the payment of the debt after defraying the cost

Water supply for Birur

Explaining the sources from which the Municipality of Birur proposes to discharge the debt and pay the interest &c

Local Govt

Submitted 11/12/91

Orders

To

The Chief Secretary
to the Govt of Mysore
Bangalore

Sir,

With reference to the
Proceedings of Government
No 4328 / 289 of the 13th July
last, I have the honor
to explain, as hereunder
from what sources the
Municipality of Bangalore
proposes to discharge
the debt and pay the
interest

2 – The necessary funds
proposed to be raised
will be –

(1.) By the levy of a
water tax on house, shop
Loom and shop taxes
at annas 12 in the rupee

(2) By additional in
= direct taxation, Viz:,
by levying octroi duty

&c

on other than the articles on which it is now levied.

(3) By soliciting the orders of Government to appropriate the whole of the Mohatarfa instead of only a moiety as at present, on condition of the Municipality undertaking to bear all the Police charges.

Note. The No. of houses, on which the Mohatarfa tax is levied, is 1331, and population according to the last Census is 4738.

3. The anticipated increase from the 1st Source, is Estimated at Rs 1,760/- at annas 12 per rupee as shewn in the margin.

House tax	1,340	Whole Mohatarfa
Shop tax	1 000	
Loom	5-	
	2,345	
At as: 12 per rupee	1760	

4. The increase from the 2d Source is Estimated at Rs 1900/- as shewn opposite. The Estimates are framed at one-fourth upon the income, Viz, 7,600, of Chikmagalur Municipality which has double the population of Birur - Viz. 7827

Present tax	720
Estimated increase	1180
Total	1900.

† Articles on which octroi is proposed to be levied newly —

Cocoanuts fresh & dry	75
Betel leaves	100
Sugar	100
Jaggery	125
Grain	100
Sheep - Goats &c	100
Tobacco	125
Total	725

Add -
The anticipated increase under the octroi duty now levied on oil & cloths with a better supervision by the proposed establishment. 455

1180.

5.— The increase from 3rd Source is expected to be Rs 1325- which is the moiety of Rs 2650/- now going to Government

6.— The anticipated increase therefore under these 3 heads - amounts to Rs 42[illegible] which together with the present "income" of Rs 2595/- aggregates Rs 6860/-

7.— The Corresponding increase in charges in Consequence is estimated at Rs 4305 as follows:—

a.	Head office charges	54--
a1.	Collection	450--
b.	Conservancy	1093--
c.	Maintenance of water works	300--
d	Police	840--
e.	Lighting	609--
f.	Education	369--
g.	Miscellaneous	90--
h.	Public works	500--
	Total	4305--

or Rs (4305 - 2859 Exclusive of Public works) 1446 more than the present expenditure

8.— From the above it will be observed that out of the income there

well, after deducting the ordinary charges, be a balance of Rs 2557/- available for paying the debt at Rs 1000/- plus Rs 1500/- interest or Rs 2,500/- in all per year.

9 – The Municipality have in their meeting of 7th October last generally agreed to the above proposals (Vide Proceedings of the meeting enclosed.)

10 – Having regard to the probable increase in the No: of houses in the rising town of Birur, as well, as to the increase ex = = pected to arise from the Mohatarfa tax after revision, while the interest payable on debt annually decreases, I am of opinion that the

Municipality

municipality may not find it efficient to repay the loan, with interest, and accordingly recommend that the payment of the loan be sanctioned on the terms proposed with orders on the execution of the work.

The Deputy Commissioner
Kaira District.

Sir,

I respectfully beg to submit in Ore the enclosed proceedings of the meeting of the Bor Municipal Board held on the 7th inst. in which the question of raising additional income f the Municipality was discussed, in order to fu funds for the repayment of the loan kindly promised by the Government for the water supp project together with its interest.

A translation of the proceedings is also sub-mitted.

I beg to remain
Sir,
Your most obedient servant.

[signature]

13/11/91

Proceedings of the meeting of the municy
of the Town of Berur - dated 7th October 1891.

This meeting was convened with the object of considering how additional municipal funds should be raised in order to repay the loan of Rs. 38,000 kindly promised by the Government on account of the water supply scheme for the Town of Berur by yearly instalments of Rs 1000 together with the interest.

The municipal members thank the Governme on behalf of the inhabitants of the Town for having so kindly undertaken the most useful work of providing water supply to this Town and promising to give the necessary funds as loan to the Muni cipality on favorable interest.

Taking into consideration the financial condi of the Municipality and the great usefulness of work proposed, the members consider that an ave -erage of a water rate of 12 annas in the Rupee on house, shop and loom taxes is fair and the Town people are agreeable to the imposition of the tax that rate.

It was next considered how the receipts and expenditure of the Municipality will stand after the measures contemplated are carried out.

The Board urge that the Government may

ual Mohatarfa realization in favor of the Municipality which in return is willing to bear the whole of the Police harges.

If the above concession be granted the income of the Municipality will stand as under- The income is calculated according to the estimated receipts of the current year.

Receipts.

Octroi	720—0—0
House tax	1360—0—0
Other items of Mohatarfa	1312—0—0
Miscellaneous	569—0—0
Water tax on house Rs. two and shob taxes at 12 annas in the Rupee on the aggregate realization of Rs 2346	1758—0—0
Total	5679—0—0

Note. The Octroi is taken as at present on oil and cloth.

Expenditure.

Head Office charges	96—0—0
Conservancy of the town and water works	1211—0—0
Police charges (which	860—0—0
Lighting	480—0—0
Education	378—0—0
Miscellaneous	90—0—0
Public Works	500—0—0
Repayment of water supply loan with interest	2500—0—0
Collection of Octroi- Present charges 100	
Increase proposed— 200	300—0—0
Total	6434—0—0

The Receipts as compared with the Expenditure

must be realized has now to be considered not desireable that water tax should be levied more than 12 annas in the Rupee. There appears no objection to Octroi being levied on dry Cocoanuts, sugar, Jaggory, Ghee, sheep goats and bullocks, tobacco, kerosine oil as in Chittagong An income of Rs 500/- from this source may looked for. Taking the receipts under this head at Rs 500/ there will still be a deficit of Rs 250. The number of houses in Bassein the interest on the loan decreases every year so the the members have no doubt that before the Water supply project is completed this deficit of Rs 2 will have been fully met.

Note. The Board is not in favor of Octroi being levied on fresh Cocoanut and betel leaves as these article are grown on a large scale and the imposition of any taxation thereon would cause great inconvenience in their being brought into the Town from their gardens, and also on the score of the import of these articles being but very small.)

As indicated above the municipality will be able to meet not only the normal annual charges but will also be in a position to repay the loan with its interest every year & the members beg that the President may be pleased to move the Govt to sanction ~~this~~ as soon as possible execution of the most useful project of providing

It may be supposed that the water rate of 12 ans the Rupee is high but as an increase of house tax expected from new houses now springing up, vain tax may be reduced in proportion to increase of municipal income from house tax from any extra realization under Octroi.

yours by the municipal members

ABSTRACT.

State that they hear that a Scheme, to supply Berur with water through pipes from Doronagere ~~tank is~~ ~~Sanctioned~~ has been Submitted for Sanction; The Scheme if S will cause them a deal of trouble:—

(1) The Supply of water from the tank to "Thari" & "lands will be materially affected. As a quantity of water greater limited one flows pipes from ~~mud~~ Medugu ~~water~~ Tank, the Storage

in the Disadvantages is greatly lessened at present and a supply of water, scarcely enough for 3 months supplies will be stored. This has obliged them to grow sugar-cultivation cultivation & these Summer Crops suffer This a fact known to the Talook and District authorities Observation of the Store of water in the tank from Feb: 9.3 to March 3 will clearly prove the above facts.

2.) They will have to pay more to take greater risks To carry out the Scheme it has been proposed that a Chanda" (Contribution) of 2000 Rs must be collected from the ryots & 5000 Rs be paid by the Municipality & 30.000 Rs be lent by the Govt and that municipality must every year pay Govt the interest on the debt & 1000 Rs to discharge the debt And the municipality is authorised to collect an excess of ~~1200~~ 12 Rs for Rupee Collected on house

They have no objection for the getting up of another reservoir & Sub-mit that Amruthavalli cutta will serve the purpose. If the proposed Scheme be Sanctioned, they pay neither Chenda nor excess amount; but if their Suggestio be adopted, they are quite willing to pay both.

Therefore they pray that the proposed Scheme may be cancelled

Subject No. 49.

Birur water-supply project.

Summary of discussion.—The Municipality of Birur cannot afford to bear the cost (Rs. 38,000) of the project for supplying water to the town through pipes laid from the Devankere Tank. Instead of this project, the Amruthaiyanakatte in front of the town may be enlarged and water supplied from it at a cost of Rs. 20,000, the channel from Devankere to Amruthaiyanakatte being at the same time put in thorough order.

Dewan's reply.—The proposed project should first be considered by the Municipal Board and submitted to Government through the proper channel.

Send Copy of this to the Chief Engr -

The Bankapur proposal seems to fall in every way - I saw this tank recently. It contains a supply quite sufficient for the supply of Birur and will not materially affect irrigation lands below - These lands as I understand receive from the main channel, and have really no claim to the water stored in the tank, which has been out of use for great many years - In order however to make this point quite clear the D.C. should ascertain & place on record correct information on the following points.

1st. When the tank breached & went out of use?

2d. When was it restored?

3d. The Source of supply of irrigation the lands below during the years the tank was out of use -

4th. How these lands are supplied since the repair of the tank?

Any supply given to these lands from the tank is liable to be stopped as soon as the water supply scheme for Birur is completed & the Dy. Comr. shd. give immediate notice of this intention to any landholder concerned –

Amildar Honnamma is reported to be a large holder of Chettikere Inam in this locality. He may be desired to ~~[illegible]~~ be allowed to take up available land elsewhere for his Chattram

The Ch. Engr. will be requested to cause the projects for water supply of Birur & the alignment be prepared by the Survey Engr. – Part of the Contract with the finish of the Tunnel & the remainder with the bunds & the Main Sply. Ch.

Kadur District Dy Commrs Office,
Dated Chikmagalur 12th August 89.

From,

The Deputy Commissioner
Kadur District

To, The Chief Secretary to the
Government of Mysore

Sir,

With reference to your letter No. 1978/2 119 of the 31st Ultimo calling for a report on the Birur Water Supply (subject No 49 in the Representative Assembly Proceedings Book for 1892), I have the honor to inform you that the correspondence is pending before Government - Vide this office letter No 468 of 9th December 1891, and which referred to the resources from which the extra money required for Colonel Bowrie's Scheme No 2 could be raised by the Municipality.

Since writing this last letter Colonel McNeil Campbell visited Birur and informed

me personally (although I have not his views in writing) that he was averse to the scheme of the same tank being used for the double purpose of irrigation and water supply to the Bibis Town, and pointed out that the Barkankere situated close to the Devankere might be set apart solely for the purpose of a reservoir. I find that the Barkenkere has a catchment of about one square mile and is fed by a Special Madabhai from the Madag Rai Kalvé, has a total achkat of Rs. 2810-8-4 and that the average Revenue derived from it for the last 5 years is Rupees 1887, including 127½ acres of Inam land, assessed at Rupees 521-12-4, below it.

From these figures it will be seen that in the event of the wet lands below it being converted into dry the loss of Revenue will be very small.

The distance of Bankenkere from Bevur is about the same as the Devankere and the cost of bringing the water from either would be about the same. Colonel Bowen has stated that in the event of the water supply for Bevur being taken from the Devankere all irrigation must be stopped when the water falls below three feet above the cill of the sluice level and which may be reckoned as December 1st. As this tank irrigates garden land almost entirely, the garden land-owners will be put to an enormous loss if this is enforced, as the irrigation of these garden lands during December, January, February and March is a positive necessity and should the owners be permanently deprived of this irrigation they would be compelled to throw up their gardens.

For these reasons I do not therefore think that the water

supply from the Devankere would be practicable. Colonel Bowen further states that should the scheme of supplying water by means of pipes from the Devankere not be practicable for want of funds, the other and less costly scheme might be adopted by protecting the banks of the Channel by means of banks etc; this would in like manner apply to the Barkenkere. I would now therefor beg to propose the following scheme that Barkenkere be utilized entirely as an impounding reservoir, that the water be taken from it in an open channel, with protected banks, to the Amarathanankhatte, where a ~~fatter~~ head should be erected and the water supplied to the town in iron pipes, and that should the head of water be found to be insufficient to allow of hydrants being erected that well protected

Karangees

Karangers be placed instead in different parts of the town. I believe that this scheme would be fairly within reach of the Municipality and that the surplus funds would very nearly if not quite meet the outlay. The people of Birim most earnestly request that some scheme may be adopted and are willing to contribute a sum of Rupees 1000/- which may be taken as a criterion of their eagerness. Should this scheme meet with the approval of Government, the D. P. W. will be asked to submit Estimates and Plans at a very early date as the question has now been pending for a very long time

I have the honor to be,
Sir,
Your most obedient servant

For [illegible]

[illegible]

Government Proceedings No 15432-3 dated the 14 ultimo, requesting to ascertain and place on record correct information on certain points relating to the Bankikere, Proposed for the Water supply of Birur Town

With reference to the queries contained in

in the above has the
honor to state as follows:-
Firstly;- The tank
breached and went
out of use some 25
years ago.
Secondly;- It is 4 years
since the tank was
restored by the D. P. W.
Thirdly;- It has been
ascertained that the
lands below the tank
were supplied with
water from the main
channel of Madagoy
by means of Madaboys
called "Agasa" and
"Kemmanamadu
Madaboys" during
the time the tank
was out of repairs.
Fourthly;- That before
repairing the tank
it was found that
the water from the
Kemmanamadu
sluice was wasted
to

to a large extent by passing through waste Amount Mahai Kanal lands, and that it would be better to close thro Kemmanamadu Sluice and repair the Bakkenkene tank, which would be fed by a waste weir from the channel and which would in its turn irrigate the lands formerly irrigated by the Kemmanama du Sluice, consequently the Sluice was closed and the tank repaire

For these reasons there appears to be a real hardship to arise by the appropriation of the tank for the water supply Projec of Bicaur Town.

Notices

Notices have, as directed, been issued to the holders of lands concerned to the effect that any supply of water given to the lands from the tank will be stopped as soon as the water supply Project for Binny is completed.

Arnoldan Nanasanna has also been informed of the orders of Government in regard to his taking up, if he desires, available land elsewhere for his chattram at Binny.

The Vernacular correspondence received from the Arnoldar on the subject is forwarded herewith for reference, if necessary, and kind return when no longer required.

Deputy Commissioner
Madura District

This inspr was called for in order to know if it directly or indirectly would interfere with the existing rights of the tank for the Binny Water Supply Project. Any lands now irrigated under the tank will have a right to the Irrigation supply from the Sluices named. I wd like to have a copy of the village map showing the lands irrigated by the two sluices below the tank & the lands irrigated by the tank & the sluices or by both the tank & the sluices only.

Also inspr regarding Nanasanna's chattram how he be intimated

ABSTRACT.

State that they hear that water will be supplied to their town from Bartanakere tank, south of Hiriyangala village by means of channels + pipes; the water of the said tank is very unclean as proved in the case of the inhabitants of Hiriyangala; that moreover they, in general, are not in need of the water-supply only the people in the Bazaar Street need it, while they have plenty of water in their wells; that they are not prepared to bear the costs of the project as they are already burdened with heavy municipal taxes. That there are two other tanks, Bevanakere + etmarayanakatte fit for the project

Deputy Commissioner's Office
Kadur District.

Chikmagalur 29th Nov. 1895.

From

The Deputy Commissioner
Kadur District.

To

The General Secretary
to the Government of Mysore.

Sir,

With reference to your docket No. 1858 / d.F. 102-93 dated 7th August last requesting full information with regard to the amount which the lands that are to be acquired for the extension of the Birur Town would cost. I have the honor to state as follows:—

The market value of the lands amounts to only Rs. 646/- as settled by the members of

the

the Board. Of the owners, only some persons refuse to give up their land unless a large compensation than the amount offered by the Board, is paid. The grounds put forward by them are untenable The rest have agreed to give up the lands on the condition of a certain number of sites in their lands being given them for building purposes. This has been approved of The accompanying statement (A) gives full details.

Besides this, the Board have resolved to remove the Madigas and Holeyas Huttis situated in the middle of the town which is most undesirable to Survey Nos. 31 and 32 which

which lands are mentioned in the Statement submitted with this office docket No. 574 dated 18th July 1895 for publication under the Land Acquisition Act. The Sanitary Engineer was also in favour of this proposal. The cost of compensation required for the removal of these huttics amounts to Rs 1,270/- as will be seen from the enclosed Statement (B). The sites now occupied by them in the Town will, after their removal, be sold and will probably realize more than the sum offered as compensation.

I beg you will kindly obtain sanction to the payment of Rs. 1921/- as compensation out of

the amounts provided under the following heads:—

Rs. 421/- from Roads, original

Rs. 1000/- from Drains, Repairs.

Rs. 500/- from Compensation.

Total Rs. 1921

With regard to the acquisit of the lands the statement has already been submitted.

I have the honor to be
Sir
your most obedt servant

Illegible

Deputy Commissioner

Kadur District

Statement (A) shewing the amount of Compensation payable to individuals, whose lands are to be acquired for the extension of the town of Birur, in Kadur Taluk, Kadur District for the year 1895-96.

ABSTRACT.

States that Survey no 37 in Kirur in his holding was asked by the Amildar of Kadur to be given for the Extension of Kirur town - that he is that he would part with the land & he was paid the amount realised by the sale of the plots into which it be divided - that as the Amildar fol- angry he deposed that he would retain it for his use - that notifica has been published in the Mysore Gazette for its acquisition - that the Municipal members intend the lands for poor people at low and utilising the amount for the improvement of the town - there are spot waste lands close by which might be given to poor for house building purposes.

ಸಂಖ್ಯೆ: ಆಡಳಿತ/ಸಿಬ್ಬಂದಿ/2024-25/ನೇಮಕಾತಿ ಅಧಿಸೂಚನೆ

ಕರ್ನಾಟಕ ಸಾರ್ವಜನಿಕ ಗ್ರಂಥಾಲಯ ಇಲಾಖೆ

ಅಧಿಸೂಚನೆ

ಕರ್ನಾಟಕ ಸಾರ್ವಜನಿಕ ಗ್ರಂಥಾಲಯ ಇಲಾಖೆಯ ಅಡಿಯಲ್ಲಿ ಬರುವ ಜಿಲ್ಲಾ ಕೇಂದ್ರ ಗ್ರಂಥಾಲಯಗಳು, ತಾಲೂಕು ಗ್ರಂಥಾಲಯಗಳು ಮತ್ತು ಗ್ರಾಮ ಗ್ರಂಥಾಲಯಗಳಲ್ಲಿ ಖಾಲಿ ಇರುವ ಗ್ರಂಥಪಾಲಕ ಹುದ್ದೆಗಳನ್ನು ಭರ್ತಿ ಮಾಡಲು ಅರ್ಹ ಅಭ್ಯರ್ಥಿಗಳಿಂದ ಆನ್‌ಲೈನ್ ಮೂಲಕ ಅರ್ಜಿಗಳನ್ನು ಆಹ್ವಾನಿಸಲಾಗಿದೆ.

ಹುದ್ದೆಗಳ ವಿವರ

ಒಟ್ಟು 37 ಹುದ್ದೆಗಳು ಅಧಿಸೂಚಿತ ವೃಂದ ಮತ್ತು ಮೀಸಲಾತಿ ಅನುಸಾರ ಭರ್ತಿಯಾಗಲಿವೆ. ಹುದ್ದೆಗಳ ಸಂಖ್ಯೆಯಲ್ಲಿ ಸರ್ಕಾರದ ಆದೇಶದಂತೆ ಬದಲಾವಣೆ ಸಾಧ್ಯವಿದೆ.

ವಿದ್ಯಾರ್ಹತೆ

ಅಭ್ಯರ್ಥಿಯು ಯಾವುದೇ ವಿಷಯದಲ್ಲಿ ಪದವಿ ಪರೀಕ್ಷೆಯಲ್ಲಿ ಉತ್ತೀರ್ಣರಾಗಿರಬೇಕು. ಗ್ರಂಥಾಲಯ ವಿಜ್ಞಾನದಲ್ಲಿ ಡಿಪ್ಲೊಮಾ ಅಥವಾ ಪದವಿ ಹೊಂದಿರುವವರಿಗೆ ಆದ್ಯತೆ ನೀಡಲಾಗುವುದು. ಕನ್ನಡ ಭಾಷೆಯಲ್ಲಿ ಓದಲು ಮತ್ತು ಬರೆಯಲು ಬರಬೇಕು.

ವಯೋಮಿತಿ

ಅಭ್ಯರ್ಥಿಯ ವಯಸ್ಸು 01-07-2024ಕ್ಕೆ ಕನಿಷ್ಠ 18 ವರ್ಷ ಮತ್ತು ಗರಿಷ್ಠ 35 ವರ್ಷ ಮೀರಿರಬಾರದು. ಪರಿಶಿಷ್ಟ ಜಾತಿ/ಪರಿಶಿಷ್ಟ ಪಂಗಡ ಅಭ್ಯರ್ಥಿಗಳಿಗೆ 5 ವರ್ಷ ಮತ್ತು ಪ್ರವರ್ಗ-1 ಅಭ್ಯರ್ಥಿಗಳಿಗೆ 3 ವರ್ಷ ವಯೋಸಡಿಲಿಕೆ ಇರುತ್ತದೆ.

ಆಯ್ಕೆ ವಿಧಾನ

ಲಿಖಿತ ಪರೀಕ್ಷೆ ಮತ್ತು ಸಂದರ್ಶನದ ಆಧಾರದ ಮೇಲೆ ಆಯ್ಕೆ ಮಾಡಲಾಗುವುದು. ಲಿಖಿತ ಪರೀಕ್ಷೆಯಲ್ಲಿ ಸಾಮಾನ್ಯ ಜ್ಞಾನ, ಗ್ರಂಥಾಲಯ ವಿಜ್ಞಾನ ಮತ್ತು ಕನ್ನಡ ಭಾಷೆಯಿಂದ ತಲಾ 33 ಪ್ರಶ್ನೆಗಳು ಇರುತ್ತವೆ. ಒಟ್ಟು 100 ಅಂಕಗಳಿಗೆ ಪರೀಕ್ಷೆ ನಡೆಯಲಿದೆ.

ಪರೀಕ್ಷಾ ಕೇಂದ್ರಗಳು

ಲಿಖಿತ ಪರೀಕ್ಷೆಯನ್ನು ಬೆಂಗಳೂರು, ಮೈಸೂರು, ಧಾರವಾಡ, ಕಲಬುರಗಿ, ಬೆಳಗಾವಿ, ಶಿವಮೊಗ್ಗ ಮತ್ತು ಮಂಗಳೂರು ಕೇಂದ್ರಗಳಲ್ಲಿ ನಡೆಸಲಾಗುವುದು. ಅಭ್ಯರ್ಥಿಗಳು ತಮ್ಮ ಆದ್ಯತೆಯ ಕೇಂದ್ರವನ್ನು ಅರ್ಜಿಯಲ್ಲಿ ನಮೂದಿಸಬೇಕು.

ಅರ್ಜಿ ಶುಲ್ಕ

ಸಾಮಾನ್ಯ ಅಭ್ಯರ್ಥಿಗಳಿಗೆ ₹ 400 ಮತ್ತು ಪ್ರವರ್ಗ-1 ಅಭ್ಯರ್ಥಿಗಳಿಗೆ ₹ 200 ಅರ್ಜಿ ಶುಲ್ಕ ನಿಗದಿಪಡಿಸಲಾಗಿದೆ. ಪರಿಶಿಷ್ಟ ಜಾತಿ/ಪರಿಶಿಷ್ಟ ಪಂಗಡ ಅಭ್ಯರ್ಥಿಗಳಿಗೆ ಅರ್ಜಿ ಶುಲ್ಕ ಇರುವುದಿಲ್ಲ. ಶುಲ್ಕವನ್ನು ಆನ್‌ಲೈನ್ ಮೂಲಕ ಪಾವತಿಸಬೇಕು.

ಅರ್ಜಿ ಸಲ್ಲಿಕೆ

ಅರ್ಜಿಯನ್ನು 15-07-2024ರಿಂದ 14-08-2024ರ ಸಂಜೆ 5.30ರೊಳಗೆ ಸಲ್ಲಿಸಬೇಕು. ಅಪೂರ್ಣ ಅಥವಾ ತಡವಾಗಿ ಸಲ್ಲಿಸಿದ ಅರ್ಜಿಗಳನ್ನು ಪರಿಗಣಿಸಲಾಗುವುದಿಲ್ಲ. ಅರ್ಜಿಯ ಪ್ರತಿಯನ್ನು ಭವಿಷ್ಯದ ಉಲ್ಲೇಖಕ್ಕಾಗಿ ಅಭ್ಯರ್ಥಿಗಳು ತಮ್ಮಲ್ಲಿ ಇಟ್ಟುಕೊಳ್ಳಬೇಕು.

ABSTRACT.

States that he was told by the Amildar that portion of his S. No. 39/36 of the above village were required for the extension of Bisur town, that upon this he made a deposition before the Amildar stating that he would part with the land in S. No. 36, provided the amount which the land would fetch in auction sale was given to him, and that if Govt was pleased to abolish the assessment on S. No. 39 and annex it to Municipality he would himself build a house on the spot; that on 13-3-96 the Amildar

amadar gave him a notice stating that he should be present at
eeting ~~to the~~ held on 20-3-94 to settle the compensation on
und; that though he was present on that day the meetin
as not held; that in a subsequent meeting the comp
f one of the lands was fixed at Rs 40 and that of the other at Rs
hat subsequently the Amildar forced him to sign a c
uttchalika by which Petr agreed to give up S. No 36 for Rs 2
romising that S. No 39 would be left in Petr's possession for
ouse building purposes; that Petr is unwilling to give up S. N
n the above condition; that he is ready to give up the land
or the amount which it would fetch in auction sale
f this cannot be done he would build himself to build
ouses there; that he may be permitted to build a house
. No 39 which should be left in his possession alone; tha
. No 36 is very valuable its price being over Rs 350 or 400 and
herefore the compensation fixed is ~~small~~, very low; that
han 60 or 70 houses can be built upon the land; that there
re ~~may~~ many S. Nos ~~are~~ viz 36-37-38-39-41-31-32 & 33
which are set apart for the construction of houses for poo
people; that most of these S. Nos are very valuable and
are applied for very high amounts; and that since
Birur is a very commercial place the price of house
sites is very high.

Prays that the records of the case may
sent for and perused, and that an equitable
may be passed in his favour thereby fixing
compensation for his land and permitting him
build houses in the spots specified by him.

permitted to build on Survey etc 39
for himself and that the sale
proceeds of sites that may be
allotted out of Survey etc 36 may
be ordered to be paid to him.

May this be forwarded to
the Dy Com for report ~~as to whether~~
the Petrs respective may not be
granted exemption assessment was actually
from him for his land DJ 10/8/96
through that hedge thereof
were cleared off as alleged by Petrs

Submitted 12/8

I call for a report on the
allegations made in
this petition

17–8–96.

ABSTRACT.

Petitioner states that he
received a Notice dated
13 3 94, from the Kadur
Taluk, stating that the
Survey Nos 36 and 39,
needed for the extension
of the Beeruru Town — and
the Petitioner should be
in his appearance on
23. 3. 94, before the Tsildr
for the purpose of his
the compensation for
said lands, to settled — and
he appeared before the
members on the said d
but for no compensation
fixed. However the Tsildr
fixed a very low compen
for

for the ~~same~~ lands, subsequent
on some other date.

2. That the Petitioner submitted
a petition to this Office
on 18.1.96, complaining
of the above — and in reply
to an order of 24.2.96, from
the Deputy Commissioner
Kadur, informing that
the encroachments after due
enquiry and consideration,
have been reduced from the
compensation named
by the Petitioner.

3. That on 31.3.96, the Pet.r
addressed a petition to
the Deputy Commissioner,
praying that the lands
under dispute, may be
taken on paying the Pet.r
a compensation of Rs.
400 — or he may be ordered
to sue for the same; but he
received no reply about
both the dates. Notwithstanding
the Cauvery is now due on the
lands under complaint,
has been removed — and
the hedges around the lands,
have been cut — and the
Petitioner thereby subjected
to a loss.

4. That the Petitioner prays
that the entire Records of
the case may be sent
for and perused, and that
orders

orders may be given
the Petitioner to build
fresh hedges of his own
in survey No. 39, and
to pay him the value of
S. No. 36.

To

The Secretary to Government
General and Revenue Departments

Sir,

In acknowledging the receipt of your offecial Memorandum No. 2467 dated 27.10.93 19th Ultimo forwarding for report, the Petition of Veerappah of Birur, Complaining against the acquisition of his lands for the Extension of the Birur town, I have the honor to report that the Settlement of Compensation Made by the Members Appears to me to be fair and equitable

2 As regards his former petition, received in this Office for disposal with your Offecial Memorandum No

No: 9486 dated 15th February 1896, I
L.T. 102-93
beg to State that due enquiry was made into the Case, and an Endorsement was given to the petitioner, to the effect that the Compensation has been fixed by the Members after Careful enquiry.

3. The lands in question were acquired under the authority conveyed in Government Proceedings No 7111-12
L.T.102-93
Dated 19th December 1896 and the other owners whose lands were similarly taken for the purpose of the Extension of the Road, have been paid the Compensation Settled

4. The Compensation offered to the petitioners have been considered fair and if they are unwilling to accept it, they have their remedy in a Civil Court. The Sale proceeds of the building sites Cannot be granted to the petitioner as they are required for making roads, improving the Sanitation of the place &c. and it

is left for the Board to offer the land required, after it is marked into Convenient Lots, either to the petitioner or other Applicants, if any.

5. The petition received with the above is herewith returned.

I have the honor to be

Sir,

With reference to your Official Memorandum No 2468/27 102-93 dated 19th Ultimo regarding the petition of Khanda Lingappa praying for the return of his land taken up for the Extension of the Birur Town, I have the honor to state that about 57 acres and 18 gunthas of land assessed at Rs 70-4-0 were acquired as per authority conveyed in Government Proceedings No 7111-12/27 102-93 dated 19th December 95 for the Extension of the town.

As already stated in para 2 of my report No 108 dated 29th November 1895, the petitioner is one of the three persons who refused to give up the land for the compen

Compensation of Rs. 60/- offered to him by the Board.

3 The land in question having already been acquired under the provisions of the Land Acquisition Act, it cannot now be returned to the petitioner, and if he is not satisfied with the Compensation offered, he may seek remedy in a Civil Court.

4. As regards the granting of certain number of Lots to the petitioner, I would leave the matter to the Board to decide along with other applicants, after the lands required have been marked off into Lots, Roads &c.

5. The petition received with the above is herewith returned. —

Read —

Letter. No 37 dated 8/9/96 from the Dy Comr. Kadur District submitting the report called for in offical Memorandum No 2468 dated L.7102-93 19th August 1896 on the petition of Khasdi Lingappa praying for the return of his land taken up for the extension of the Birur town

Order thereon

4137 / 102-93. 24/9/96

As observed in Pro No 3841 / 113-93 dated 19th September 1896, the mere publication of a declaration under the Land Acquisition Regulation is insufficient to meet the requirements of Law. An award should be made, and if the Petitioners are dissatisfied with it, a reference should be made to the Court as laid down in Point III of the Regulation. Hence the following further enquiries should be made:

(2) The Municipal Board of Birur should be ascertained in regard to the Petrs' prayer contained in para 2 of his petn and reported thereon;

Submitted! May we call the Dy Comr to make the report now?

17/9

Read:—

Letter No. 36 dated 8th September 1896 from the Deputy Commissioner of Kadur submitting the report called for in Offl Memo No 2467 / L 7102-93 dated 19th August 1896, on the petition of Veerappa of Birur complaining against the acquisition of his lands for the extension of the town of Birur.

———o———

Order thereon.

The attention of the Deputy Commissioner of Birur is invited to Govt the marginally noted Proceedings ~~Proceedings of Govt dated 19th Sept 96~~ 113-93 and he is requested to state whether an award was made under Sec: 11 of the Land Acquisition Regulation. If not this should now be done; and if, on the event of the petitioner being dissatisfied, a reference should be made to

No 3752-60 / R 416 dated 20/8/93

From

The President
Municipal Boards
Kadur District

To

The Secretary to the
Government of Mysore
Bangalore

Sir,

In reply to Government Proceedings No 7381-2 / L.T. 102-93 dated 10th February last, requiring the scheme for supplying water to the town of Bunr from Bantinkere costing Rs 35008/-, I have the honor to report that the Municipal Board of Bunr have, in their Proc. dated 22nd idem, resolved that they are prepared to contribute a moiety of the cost of the work viz: Rs 17504/-, that Rs 9000/- the balance now at the credit of the Municipality may be utilized for the purpose and that the remaining Rs 8504/- may be obtained as a loan from Government, repayable by

by annual instalments of £25
with interest at 4 per cent.

2. I enclose herein, for reference an Extract from the Proceedings of the Municipal Board requiring to have on a copy of report from the General Assistant Commissioner whom I deputed to ascertain whether the alleged popular objection to the water of the Bankenkene tank was worth consideration. From his report, it appears that the objection was the outcome rather of selfish motives than of any real popular dislike on the part of the inhabitants of Biuw to the water of the Bankenkene.

3 I would request therefore that you will be so good as to obtain the sanction of Government to the proposals under reference.

I have the honor to be
Sir,
Your Most Obedient Servant

[illegible] Office Durban 4th April 1898

Dated [illegible] April 1898

Enclosure [illegible]

Submitted to the Deputy Commissioner for orders, in reply to his order dated 26th March 1898

I assembled the respectable inhabitants of Sinnon the 8th inst to ascertain the existence of any public feeling against the use of the Bambenhene tank water by the Sinnon townspeople. The Municipal-Commissioners have no objection to the use of Bambenhene water. The people who object to it are certain landowners who hold gardens under the Devonvene and some others acting on the advice of such landowners. The objection of these people to the use of Bambenhene water is not founded on any reasonable grounds. None of them have ever used it even tasted the water. The soil of the

The Barkuntane tank appears to be a similar, to that of the Devanthane tank and both the tanks appear to be overgrown with rivulet the same sort of vegetation. I cannot therefore conceive why the water in one tank could be more unhealthy or distasteful than the water in the other. So far as I was able to make out from my talk with the objectors to the Barkunthane scheme, their real purpose appears to be to induce the Government to give up the Barkunthane scheme and utilize the Devanthane for the Simla water supply with the belief that if the Devanthane tank were to be used as the water supply reservoir, the Government will improve the tank and increase its capacity and thereby provide additional facilities for the irrigation of their lands under the tank.

I disabused the men of the above

some help will result from the channel but the cost of the Irrawaddy project is a big deal, the profits are the land will not be applied wi water during the three driest months of the year when owing to the cessa of discharge from the Irrawaddy chann all the water in the tank will be needed for the Sinin town. The Irrawaddy project has to be aband if the D.P.W. do not believe it pos to turn into the tank, before the channel runs dry, 50 units of wa needed for the Sinin town for three months plus the quantity of water required for the gardens during th three hottest months of the year.

2. As remarked by the Chief Engineer in para 3 of his report, the use of the same tank for both irrigation and water-supply, will give rise to frequent complaints with and complaints from myot

myself. The Bankenkere project is quite free from this evil. There are no lands depending on this tank for irrigation. The lands under the tank get their supply direct from the Hindon Channel and will not suffer in any way on closing up Bankenkere for irrigation. I think therefore that the Bankenkere project may be adopted.

dated 25th December 1901 forwarding the Chief Engineers letter no: 4786 and its enclosures together with the tracing plan of the Birur Town in the matter of constructing a reservoir there, and laying out pipes therefrom the Annoo-langana Katte, I have the honor to invite - Kind reference to the resolution passed at the Birur Municipal Board meeting held on

the

the 29th September 1896, a copy of which is hereu
enclosed for reference.

The question of permanent water Supply
Scheme formed the subject no. 49 of the Representa-
tive Assembly held at Mysore in October 1892.
Two alternative projects, one from Birur Bankan
Kere and the other from Birur-Devanakere were
contemplated.

The late Dewan and the then Chief Engineer
Col Brown were in favor of the Bankankere Schem
(vide Govt no: 15432-3 / R 102-93 dated 17th March 1894 and
Chief Engineers memo no: 85/627 dated the 2nd
February 1898).

The objections raised by the town people
Birur with regard to Bankankere scheme were
on enquiry found to be the outcome, rather of
selfish motives, than of any real popular dis-
like on the part of the inhabitants vide corres-
pondence ending with this Office docket no: 167 date
the 20th may 1898.

The question has been pending for 12 years
past and nothing has yet been done in the
matter.

Since the submission of the above scheme, the town of Birmingham has been extended by acquisition of lands which has created a pressing necessity for a water supply scheme.

The tracing plan with the Government order under observance is herewith resubmitted

I have the honor to be,
Sir,
Your most obedient servant,
[signature]
President of the
Municipal Board
Eastern District

Jw 7058-65 ~~7~~ 8/11/1902
LT. 102-93

Pres: of the Board of Supervisors

Some observations have been made in various parts of the County Municipality on the Grand Canal Scheme for the present Year. It is hoped that this work may be finished and completed in a satisfactory manner as early as possible & before the Month of the Month when the Canal may be required for Traffic. During last year the Boats in the Canal were badly affected last year.

2. For working a Canal it is difficult to say what exact improvements are necessary - Every Engineering Engineer would like to have a Work Station on which should be worked all existing Roads and Canals

—ue as all Improvements—
The closing balance shown
in the Budget for 1902/03
is somewhat in excess
of the prescribed minimum
balance. Proposals for
the reduction of the
(about a thousand £)
excess are awaited.
The banking condition
of the town does not
seem to be very satisfactory
and there is much
room for improvement.

2 - The action of some
of the local and in
- particular commercial
houses in disbursing
small wages in certain
localities are not now
called upon
to question the items
brought under taxation
The explanation
- given must be
deemed - Action must
not any other item
seem to admit of
- legitimate expansion
so as to enable the
town-keeping Income to
improved & efficiently
conducted - This must be
the chief improvement

I demand a copy
of the Report of the Board
of the Directors.

6 Huliyar

— 4 —

With reference to the above, has the honour to observe that all the plans are prepared on ~~plain~~ flimsy paper which cannot stand frequent handling in this office. There is no uniformity either in the

of the plans or in
method of preparation
plan of the Kavaraga da Town
is simply a copy of the
Survey map of the place
and serves no useful purpose
as neither houses, nor
public buildings, nor
streets are properly marked
and named. In the Kunigal
Petta and Fort plans, none
of the main streets and
roads have been named,
while in others, though
main roads and streets
have been named, ~~xxxxxx~~
minor streets have not
been marked.

The maps are therefore
herewith returned with a
request that the President
will be ~~xx~~ good ~~xx~~ enough to send
better maps drawn up on
tracing cloth and with proper
details

Received
General No. 17872
No. 102-93
Enclosure No. 5 Maps

Ul 2nd Pl. 2286

His letter no 1319 dt 25-5-03,

Doddballapur
Chennapatna
Closepett
Kankanhalli
Magadi

submitting the sketch plans ⊗ of certain Talties in his District

---

With reference to the above has the honour to observe that the plan of Kankanha prepared on tracing paper is already torn; and non of the existing streets & lanes of the town have been marked therein. In

the town plan of Closepet also very few of the existing roads & lanes are mentioned 2ly the plan of Magadi is prepared in 4 separate parts; and buildings & places of public interest have no been marked & named thereon.

The maps ~~of Kankanhalli Closepett & Magadi~~ are therefore ~~herewith~~ returned, with a request that these and the ~~remaining~~ Maps of the Municipalities of this District may ~~maps (vide U.O. P 11554-61 / 2.7102-03 dy 10-7-03)~~ of his district, ~~should not~~ may be drawn upon tracing cloth, ^ with proper details showing public buildings, ~~etc~~ streets & lanes &c & linked to this Office as desired in this Office No 1769-1-8 / 2.7102-93 17/6/03

To

The President of the
Sanitary Authorities of the
Counties of

Sir

I am directed by the Local Government Board to inform you that they have received from the Commissioners of Valuation a statement of the amount which will be required to defray the cost of the preparation of the maps of each Municipality, the Local Taxation Account, and the Grand Jury Cess, and they have to request that you will cause the amount to be included in the estimates for the General Purposes of the County at large, to be presented at the next Spring Assizes.

I am, Sir,
Your obedient Servant,

Secretary

Q.a. 2367

21 Nov 93 - 7 30/6/23

With reference to the above, I have the honour to request that the President will be so good as to state the probable cost of the cloth required

for each municipality
and to point out the
particular Budget head
under which savings are
expected & from which the
~~it~~ is proposed to be
met in each town
